

# 2024 ENVIRONMENT SHEET V2

Swiss Krono keeps abreast of regulatory developments relating to chemical products and follows a strict procedure before implementing a new product on its site.

## REACH REGULATION

**REGULATION 1907/2006/CE**

The marketing of our panel products is not subject to the registration and notification procedures defined by regulation 1907/2006/EC.

Our products do not contain :

- Substances of very high concern which are candidates for authorization (SVHC list) at more than 0.1% by mass;
- Substances subject to authorization (Annex XIV);
- Substances subject to restriction (Annex XVII).

We ensure that our suppliers register substances and mixtures for our business and uses.

## POP REGULATION

**REGULATION 2019/1021**

We do not introduce into our products any substances covered by Annexes I, II and III of the Regulation on Persistent Organic Pollutants.

## BIOCIDES REGULATION

**REGULATION 528/2012/CE**

SWISS KRONO's finished particleboard and OSB products do not contain any biocide.

In response to a specific need, SWISS KRONO OSB 3 Anti-termite panel contains a biocide authorized by the EC regulation.

## PFAS REGULATION

**REGULATION 2022/2388**

No PFAS substances (per - polyfluoroalkylated substances) are produced by degradation, nor used, produced, treated or discharged by our facilities.

## HEAVY METALS

We regularly check our wood supplies for the presence of heavy metals. This characteristic is the subject of a special clause in our wood supplier specifications.

The binders used in the composition of our wood-based panels do not contain heavy metals.

All panels produced by SWISS KRONO have a heavy metal content corresponding to that of natural wood-biomass, allowing them to be recycled.

## AGEC ACT

Swiss Krono complies with the AGECE law on endocrine disruptors.

Sully-sur-Loire, May 14, 2024
